

SIMStation Product Comparison

Healthcare simulation recording, observation and debriefing solutions

SIMStation Go

PORTABLE. FLEXIBLE. READY.

SIMStation Essential

COMPACT. VERSATILE. PROFESSIONAL.

SIMStation Pro

MOBILE. MODULAR. SCALABLE.

SIMStation Enterprise

CENTRALISED. POWERFUL. LIMITLESS.

Best suited to	In-situ training, outreach and teams moving between departments or locations.	Smaller simulation environments and flexible clinical skills training.	Advanced mobile or fixed simulation for hospitals and education providers.	Dedicated, large-scale simulation and learning centres.
System format	Highly portable, compact system designed for rapid deployment.	Compact professional system supplied in mobile trolley-based units.	Modular professional system with separate simulation, control and debriefing components.	Server-based, fully integrated facility-wide solution.
Mobility	Highest	High	Mobile or permanently installed	Primarily fixed installation
Typical scale	Single-room or point-of-care simulation.	Small simulation spaces and straightforward workflows.	More complex, multi-space scenarios with room to expand.	Complex multi-room and multi-user environments.
Core capability	Capture, monitor, record and review simulations wherever training occurs.	Professional recording, observation and debriefing in a compact configuration.	Advanced recording, live control and debriefing with modular expansion.	Centralised control, extensive AV integration and scalable centre-wide workflows.
Why choose it	The simplest way to take simulation AV technology to the clinical team.	A strong balance of portability, ease of use and professional capability.	Greater flexibility for organisations with evolving or advanced requirements.	Maximum configurability, integration and long-term scalability.
